## Verney-Carron – The Art of French Gunmaking, Est. 1820

*« I have a Verney-Carron rifle that I have been hunting with since 1999. »*

*« This brand of shotgun has been with me since I was 16, so 48 years of good and loyal service. »*

*« I have a Verney-Carron gun from 1964, which I still use every Sunday... A very nice gun, stable and accurate. »*

While the uncertainty related to the pandemic has continued to leave its mark on our lives and those of our loved ones in 2021, the testimonials we have received from our clients in recent months have warmed our hearts and filled us with gratitude.

In 2020, the Maison Verney-Carron celebrated its bicentennial, the culmination of two hundred years of uninterrupted history. This extraordinary celebration has prompted us to redefine our goals to better serve our dear customers and their love of nature.

At Verney-Carron, generations of master gunsmiths have handed down their unique know-how guided by a quest for excellence. Today, two centuries after the creation of the company, we try to follow in the footsteps of our predecessors by adhering to a single idea: remain loyal to the heritage and the original values set up and passed on by Claude Verney and Antoinette Carron, our founders.

Furthermore, we believe that hunting is a true *art de vivre* in its own right: heading out on an adventure, being attentive to all the signs and signals of the wildlife around us, appreciating the presence of friends and family and the joy of sharing, savoring the warmth of the fire

after a beautiful day outdoors... without forgetting all the beneficial ways in which hunters help to preserve plant and animal life. In addition, hunting has evolved throughout history, including in France, leaving its mark across a broad range of cultural fields including literature, architecture, art, gastronomy, and even fashion.

We are extremely proud to continue contributing to the enrichment of nature and culture that hunting provides through our role as *créateur* in the gunmaking universe. We share our *savoir-vivre* and strive to play a part in shaping a more responsible world by always trying to set a positive example so as to better respond to the evolution of our society.

Tradition and heritage come together to promote innovation in our family-run company. We continue with our ambition to increase our capacity to create even more innovative and reliable products to meet the fast-evolving expectations of our customers. This 2022 edition will give you a glimpse into the new chapter of the story we would like to keep writing with you.

Wishing you a good read,

The Board of Directors

Jean Verney-Carron, President  
Guillaume Verney-Carron, Managing Director

# Ode to Nature

Arms manufacturing in Saint-Etienne goes all the way back to the Middle Ages. At that time, the city was already highly renowned for its cutlery craftsmanship. Over time, armourers' workshops and mills were set up on the banks of the Furan, whose waters were ideal for tempering steel. In the 16th century, the craftsmen of Saint-Etienne mastered ironwork, and the reputation of their arms prompted King Francis I of France to organize the manufacture of firearms for his royal armies in 1537. Thanks to the exceptional quality and the reputation of the city's artisans, which became even stronger over the course of time, Saint-Etienne acquired its official status as France's gunmaking capital in 1764 under the reign of Louis XV.

Claude Verney (1800-1870) was part of this tradition of excellence. Born to a family that was already deeply invested in gunmaking, a practice initiated back in 1650 or even earlier, Claude relied on the know-how accumulated over nearly two centuries, along with the ingenuity and love of fine craftsmanship passed down from his family.

Awarded first place in the gun stock carving category at the Gunsmith Competition of Saint Etienne in 1820, he received this high distinction with a representation of Diana, the goddess of the hunt. On this walnut gun stock, the craftsman created the goddess of the hunt out of solid wood, carving it with great delicacy. It represents Diana as a lover of the forests and mountains, standing on a fragment of rock, dressed as a hunter, grabbing an arrow in the quiver she carries on her shoulder. She is draped with two garlands of foliage; one of oak, the other of laurel. In this natural decor, her dog is by her side.

A true ode to nature, Claude Verney brings together the communion of human beings with flora and fauna in a single image and presents the founding values of his gunmaking company.

For six generations, Maison Verney-Carron has been perpetuating this cultural heritage while respecting the values handed down from its founder. That is why, even today, great attention is paid to the decoration of the stocks, receivers, side plates, and sidelocks, all finely adorned with floral and animal motifs paying tribute to nature, without which hunting wouldn't exist.

Sculpture on the gun stock made in 1820 by Claude Verney for the Gunsmith Competition of Saint-Etienne. [Photos by Sylvain Madelon]

# Bespoke Handmade Guns

An impeccable mix of quality and taste, of traditional craftsmanship and cutting-edge technology, the VERNEY-CARRON COLLECTION is a quest for perfection based on the French *savoir-faire* refined during two centuries of history.

Every shotgun and rifle carrying the name VERNEY-CARRON COLLECTION is handmade in our workshop dedicated to bespoke service, where we build each gun so that it perfectly fits our client's physical specifications and fulfills their unique desires and requirements. A true work of art and a symbol of heritage, every gun benefits from the sterling work of our master gunsmiths, who endeavor to achieve the best quality and accuracy on each part they touch. A veritable gem in the field of gunsmithing, each creation, with its wonderfully drawn lines and remarkably fine finishing, is made with the noblest materials and bears the ardor, soul, and signature of the best French artisans.
